ZARNI NWAY OO

Dublin, Ireland | +353831367028 | znwayooo@gmail.com | zarninwayoo.me | github.com/znwayoo | linkedin.com/in/zarninwayoo

SUMMARY

Business and Data Analytics professional with 6+ years of experience leading operations, building data-driven strategies, and scaling ventures across technology and agriculture sectors. Co-founded Myanmar's first digital bus ticketing platform and grew an agricultural machinery business unit from zero to ~$10M revenue, applying market analysis, financial modelling, and structured decision-making throughout. Forbes 30 Under 30 Asia (2016). Since then, made a deliberate move into technology, retraining through a BSc (Hons) in Computer System Engineering (First Class Honours) and an MSc in Business Analytics (First Class Honours) at UCD Michael Smurfit Graduate Business School, building formal expertise in Python, SQL, machine learning, statistical methods, and optimisation. Since September 2026, working as an AI & Automation Specialist at DigiCare, automating business processes with Python and Power Automate.

PROFESSIONAL EXPERIENCE

AI & Automation Specialist — September 2026 - Present

DigiCare, Dublin, Ireland

Automate business processes and build digital tools at DigiCare, a healthcare software company behind a medication-management platform, and for a partner community pharmacy business.

- Build Python scripts that complete whole tasks through software user interfaces from start to finish, replacing manual click-through work.
- Built Python and Power Automate workflows for staff rota scheduling and other manual business processes, translating needs from non-technical leadership into working automations.
- Prototyping a mobile companion app for the DigiCare web platform with leadership and the platform's developer.
- Migrated existing users and their data to the company's new learning platform, tested it with the developer to find and fix bugs, and built SCORM e-learning packages for onboarding and training.

Business Unit Head — September 2016 - November 2019

IME International Co., Ltd., Yangon, Myanmar

Established and led the Agricultural Machinery Business Unit (imeinternational.com.mm) with executive-level responsibility for strategy, operations, and stakeholder engagement across a ~200-person nationwide operation spanning 12 locations.

- Directed nationwide market analysis by conducting **100+** farmer interviews and synthesising sales data, developing a data-driven market entry strategy that contributed to **~$5M** first-year revenue.
- Scaled the business unit to **~$10M** revenue by establishing **12** strategic sales and service networks, positioning YTO as Myanmar's leading Chinese tractor brand through data-backed distribution strategy.
- Coordinated cross-functional collaboration with international suppliers (China, Korea, Japan), local banking institutions, and government agencies, aligning multiple stakeholders around shared commercial objectives.
- Standardised operations through SOPs, structured reporting frameworks, and supplier coordination processes, reducing operational inconsistencies by **70%** across a distributed workforce.
- Developed feasibility studies and financial models in Excel translating raw data into actionable reports that supported investment decisions for senior leadership.
- Analysed sales trends, adoption patterns, and seasonal demand to produce structured reports guiding resource allocation and business planning priorities.
- Travelled internationally to evaluate suppliers across China, Korea, and Japan, conducting due diligence and securing exclusive distribution partnerships including YTO, Kioti Daedong (Korea), and Yanmar (Japan).

Co-founder & COO — April 2013 - September 2016

Ignite Technology Group, Yangon, Myanmar

Co-founded Myanmar's first intercity bus ticketing platform and held the Chief Operating Officer (COO) role, leading operations across rollout, partner onboarding, and platform adoption. Transformed manual booking into a nationwide digital network. Forbes 30 Under 30 Asia (2016).

- Led the full product lifecycle from market research and requirements gathering through platform development, pilot testing, and nationwide rollout across **200+** retail partners.
- Conducted **200+** surveys and stakeholder interviews to build a data-driven market entry plan, achieving **60%** digital adoption within **6 months**.
- Oversaw technology rollout and trained **500+** partner staff across bus operators, retail chains, and travel agencies on the new digital platform, improving ticket distribution efficiency by **80%**.
- Secured **$200k** in funding through investor-ready pitch materials, financial models, market forecasts, and growth scenarios presented to investors.
- Built operational reporting systems using Excel to track sales performance, revenue trends, and partner activity, establishing a data-driven management approach from day one.

EDUCATION

MSc in Business Analytics (First Class Honours) **September 2025 - September 2026**

UCD Michael Smurfit Graduate Business School, Dublin, Ireland

Modules: Statistical Methods, Optimisation in Business, Programming for Analytics (Python, SQL), Business Analytics, Decision & Behavioural Analytics, Managing Data and AI, Business Decision Support Systems, Statistical Learning, Capstone Project

BSc (Hons) Computer System Engineering (First Class Honours) **February 2022 - February 2025**

University of Sunderland, London, UK

Relevant Modules: Artificial Intelligence, Advanced Data Technology, Data Structures & Algorithms, Product Development, Computing Project Management, Mobile Development, Programming

PROJECTS

UK Study Visa Ban Analysis (Policy Data Analytics) | github.com/znwayoo/uk-study-visa-ban-analysis

Built a modular ETL pipeline in Python (pandas, NumPy, matplotlib, seaborn) processing 1.2M+ rows across 8 UK Home Office datasets (2015-2025), producing 30+ analytical tables and an interactive Tableau dashboard to evaluate the evidence behind a government policy decision.

- Tableau Dashboard

Diabetes Risk Prediction (End-to-End ML Solution) | github.com/znwayoo/Predicting-Diabetes-Risks

Built a multi-stage data pipeline processing 400K+ CDC BRFSS 2023 records through data cleaning, feature engineering (reducing 350 variables to 14 key predictors), statistical analysis, and predictive modelling using Python and Scikit-learn.

- Trained and evaluated **6** model types (Decision Tree, Random Forest, XGBoost, LightGBM, Logistic Regression, KNN), achieving **84%** accuracy with SMOTE for class imbalance handling and SHAP for model interpretability.
- Deployed two applications: a Streamlit prototype (diabetic-doctor-zno.streamlit.app) and a full-stack Flask and React.js solution (ml-doctor-frontend.onrender.com).

LLM Job-Relevance Scoring Pipeline (Personal Automation) | 2026

Built a scheduled pipeline that collects Ireland-based job postings from three job boards through a REST API, removes duplicates, applies rule-based filters with every failure reason logged, then uses an LLM to score each remaining posting.

- Wrote the five-dimension scoring rubric (0-100) and hard-reject rules the LLM applies, with **97** of **399** collected postings scored and every decision archived to CSV.
- Wrote a Python script that reports skill-gap frequency, fit-score distribution, and source reliability across runs.

Human Emotion Detection Using CNN | github.com/znwayoo/Human-Emotion-Detection-Using-CNN

Developed a custom CNN architecture (5 convolutional layers, 4.5M parameters) using Python (TensorFlow, Keras, OpenCV) for facial emotion recognition across 7 categories, trained on 22K+ FER2013 images.

- Applied data augmentation, batch normalisation, dropout regularisation, and learning rate scheduling to achieve **~66%** accuracy, validated against the external CK+ dataset (**981** images) for cross-dataset generalisability.

KEY SKILLS

Data & Reporting: SQL, Tableau, Power BI, Advanced Excel (financial modelling, pivot tables, scenario analysis), Dashboard Development, KPI Design, Reporting Solutions, Data Visualisation

Analytics & Programming: Python, Statistical Analysis, Hypothesis Testing, Regression Analysis, A/B Testing, Predictive Modelling, Data Pipelines, Feature Engineering, Data Cleaning & Validation, Relational Databases

Business & Stakeholder: Requirements Gathering, Stakeholder Engagement, Cross-functional Collaboration, Financial Modelling, Feasibility Analysis, Market Analysis, Process Mapping, Root Cause Analysis, Project Management, Change Management

Supporting Technical: Machine Learning, Deep Learning, Workflow Automation (Python, Power Automate), Streamlit, Flask, React.js, Git/GitHub

AI & LLM Tooling: Generative AI, Prompt Engineering, LLM-based Scoring and Automation, AI-Augmented Analytics Workflows, LLM-Assisted Code Generation

VOLUNTEERING

Intro to Python Tutor, Backend Maintainer & Event Facilitator **2025 - Present**

MMDT (Myanmar Data Tech) Community

Support Intro to Python learners and maintain the community website backend and Telegram bot. Served as technical facilitator at Google Build With AI (May 2026), a 3-day workshop organised by MMDT, supporting participants hands-on with Google Cloud Platform (GCP) and Gemini AI usage as they built solutions during the event.

CERTIFICATIONS

- Python Data Associate | Python Data Scientist | Python Data Analyst | Data Literacy (DataCamp)

AWARDS

- UCD MSc Academic Excellence Scholarship
- Forbes 30 Under 30 Asia (2016)
- Rice Bowl Startup Awards (2015)
